

The pencil case

By Elisa Moretti

I need

- scissors
- corn leaves
- needle
- frame

How to do it

Step1: Take the corn leaves and make a large rope, rolling and twirling them.

Step2: Insert the nails, three on the left and three on the right at the streams of the frame.

Step3: Pass the rope for six times around the nails (red arrow).

Step4: Pass other twelve ropes around the frame from the front side to the opposite (blue arrow).

Step5: Twist in and out the ropes weaving the basket (yellow arrow).

Step6: After a series of turns stop and cut the ropes in order to fix the work and with a hook pass in and out of the weaved basket.

Step7: Pull out the frame and your pencil box is ready.
