

My project : the pencilcase

By Martina Spollero
4th Class Primary School of Attimis

I need

- corn leaves
- needle
- wood
- hammer
- mails

How to do it

1 step: measure the frame prepared in wood in order to sign the corners where you put the nails (see following step)

2 step: put the nails on the shape .

3 step: roll the corn leaves to make a rope and put it around the nails and around the frame

4 step: roll the corns leaves in order to make a rope until you finish the pencil case.

See here! This is the start point on the middle nail.

5 step: with the needle put the ends of the rope inside the corn leaves to finish the work..

Step 6: Cut each rope and fix it inside the chest corn ropes: it is finished. Draw it out the frame.

Now you have got a small chest: your handmade pencil case!!!
